DETAILED ACTION

Oath/Declaration

1. The oath or declaration is defective. A new oath or declaration in compliance with 37 CFR 1.67(a) identifying this application by application number and filing date is required. See MPEP §§ 602.01 and 602.02.

The oath or declaration is defective because:

The residence information for Martin E. Smith does not agree with the signed post office address.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 1-10 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 recites the limitation "said membrane inner surface" in line 4. There is insufficient antecedent basis for this limitation in the claim. In line 3, the phrase --having a membrane inner surface-- should be inserted after the word "membrane" in order to provide proper antecedent basis. This is similar to language used in claim 19.

Claim 2 recites the limitation "said membrane inner surface" in line 3. There is insufficient antecedent basis for this limitation in the claim. The above changes to claim 1 will correct the antecedent basis problem in claim 2.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 11, 12 and 14 are rejected under 35 U.S.C. 102(b) as being anticipated by Bishop.

Bishop shows a sprayer assembly comprising all the featured elements of the instant invention, note specifically a housing 13 with a transverse opening 14, a water passage 16, a product passage 19 and an outlet aperture 17; and a valve formed with a water port 23, a mixture port 25 and a product port 26.

Allowable Subject Matter

6. Claim 19 is allowed.

7. Claims 13 and 15-18 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

8. Claims 1-10 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action.

Art Unit: 3752

Conclusion

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Clark, Mills et al, Fugent et al and Magaha, Jr. show various types of sprayer assemblies with rotary type valves controlling an aspirating passage.
